Introduction

This guide was developed to assist educators in understanding and using the Fall 2005 Michigan Educational Assessment Program (MEAP) assessment results.

Essential report summaries are included in your shipment of reports that will provide information on the status and progress of Michigan's students. These reports are intended to reflect the data needed to meet the expectations of state and federal legislation. In accordance with these mandates, separate summary results are provided for the following three student population groups: all students, students with disabilities, and all except students with disabilities.

The table on page 3 lists the reports in the sequence they occur within your District and School packets. Included in the table is a brief purpose statement for each report, a list of the student populations represented in the report, and the report distribution. Detailed descriptions and key components of the reports are provided in this document as well.

The Office of Educational Assessment and Accountability welcomes your comments and feedback. We are committed to providing Michigan educators, parents, and other stakeholders an assessment program of the highest quality and reliability.

Preliminary Reports

The Fall 2005 Assessment Cycle incorporates two significant changes to the MEAP assessment.

- 1) This is the first time that the ELA and Math assessments were administered across all grade levels 3–8, incorporating four additional grade levels. Previously students were assessed once at the elementary level and once at the middle school level.
- 2) The Assessment Administration Window changed from mid-school year to beginning of the school year. Changes have been made to school curriculum and assessment items to reflect the change in the academic year when the assessments are administered. For example, the Grade 5 Science assessment previously measured student performance at mid-year in Grade 5. Now the Grade 5 Science assessment is administered at the beginning of Grade 5 and measures student performance on completion of Grade 4 content expectations. Similarly, the Grade 8 Social Studies assessment previously measured student performance at mid-year in Grade 8. Now the Grade 9 Social Studies assessment measures student performance on completion of Grade 8 content expectations, at the beginning of Grade 9.

Standard Setting - Due to the significant changes in the MEAP assessment, new standards need to be established for the Fall 2005 assessments in each content area and across all grade levels. In order to distribute student results to schools and districts so they can begin using the data, ***Fall 2005 Preliminary Reports*** have been generated to give you information on the individual assessment items, and student raw score data (number of points earned out of the total number of points possible). Final reports will be distributed including Student Raw Score, Scale Score, and Performance Level attained, once the standard setting process has been completed.

The following ***Preliminary Reports*** are available on the OEAA MEAP-Secure website:

- Item Analysis Report
- Class Roster Report
- Individual Student Report

The ***Released Item documents*** to be used with the reports are available for each grade level and content area assessed, at www.michigan.gov/meap. Copyright permissions for the ***Fall 2005 ELA Reading Selections*** did not include Internet permissions. Ten printed copies of the Released Item Reading Selections for Grades 3–8 will be mailed to each school and district with their Final Reports.

If you have questions regarding the ***Preliminary Reports*** or ***Released Item documents*** please contact the Office of Educational Assessment and Accountability:

Phone: 1-877-560-8378

Fax: 517-335-1186

E-mail: meap@michigan.gov

Fall 2005 MEAP Reports — Grades 3–9

Report Title	Purpose	Reported Populations	Distribution
Summary Report <i>pages 18–19</i>	A comparative set of mean scale score information for each grade level, summarized by school, district, ISD, and state. All content areas and levels of performance are reported.	Separate reports for all students, students with disabilities, and all except students with disabilities	School District ISD State
Demographic Report <i>pages 20–21</i>	A comparative set of mean scale score information for each grade, summarized by school, district, ISD, and state. All content areas and levels of performance are reported for each demographic subgroup with at least 10 students.	Separate reports for all students, students with disabilities, and all except students with disabilities	School District ISD State
Feeder School Report <i>pages 22–23</i>	A comparative set of mean scale score information for feeder schools. All content areas and levels of performance are reported.	All students coming from the feeder school within the district at transition grade levels	Feeder School District
Item Analysis Report <i>pages 24–27</i>	A description of each multiple-choice and constructed-response item on the assessment, including the primary Michigan benchmark measured by each item. This report shows the percentage of students selecting each response and indicates item statistics summarized by class or group, school, district, and state.	Separate reports for all students, students with disabilities, and all except students with disabilities	Class/Group School District State
Class Roster <i>pages 28–31</i>	Summary score information by class, for each strand and benchmark (GLCE) assessed within each content area, including detail information for each student assessed.	All Students	Class/Group School
Individual Student Report <i>pages 32–33</i>	Printed for individual students, this report provides a detailed description of the student's performance on each strand and benchmark (GLCE).	All Students	Class/Group School
Student Record Label <i>pages 34–35</i>	Summaries of individual student performances in all content areas in label format.	All Students	School
Parent Report <i>pages 36–40</i>	Printed for individual students, this report provides a summary description of the student's performance by strand, for each content area assessed on the MEAP.	All Students	2 copies 1 for parent 1 for school

Section 1

Scoring

Criteria set by Michigan educators are used to score all MEAP assessments.

Definitions

Scale Score

A scale score is defined as a stable score on the assessment that is reported for each student. It is constructed in such a way that it has clear meaning. On the Grade 3 assessment, a score of 300 is assigned to a third-grade student who barely meets Michigan standards. The same pattern is followed for each grade level assessment (e.g., 400 is assigned to a fourth-grade student who barely meets Michigan standards, 500 is assigned to a fifth-grade student who barely meets Michigan standards, etc.). The scale score is stable because it allows for students' scores to be reported on the same scale regardless of which year they took the assessment, and which form of the assessment the student took.

Scale scores are not comparable across grade levels. A scale score of 400 on the Grade 3 assessment **does not** indicate that the third-grade student would be considered as meeting standards on the Grade 4 assessment.

Performance Level

A performance level is defined as a range on the score scale that corresponds to student achievement levels, *Apprentice*, *Basic*, *Met Expectations*, and *Exceeded Expectations*. The divisions between the levels are called Cut Scores, and are recommended by a panel comprised of educators and other stakeholders throughout the state. This panel uses detailed descriptions of what students in each of the performance levels should know and be able to do. Based upon these detailed descriptions and actual assessment items, the panel recommends the score that best separates each performance level from the next. The Michigan State Board of Education approves the final Cut Scores and Performance Level ranges.

Machine-Scoring Process

Multiple-choice assessment items are scored by computer. In responding to these items, students must select the one best answer from the four choices

in grades 4–9, (or three choices in grade 3), in order to get the item correct. Each item is worth one point. There is no penalty for guessing. Multiple responses and omitted items are scored as incorrect.

Handscoring Process

All constructed-response items requiring short or extended written responses are evaluated by human scorers. The technique used in English language arts (ELA) and social studies is holistic scoring, the most widely used scoring method for large-scale assessments. Guided by precise criteria, scorers review a response for an overall or “whole” impression and assign a score. Extensive professional practice and research have refined and validated the critical steps that ensure consistency in holistic scoring. Because these are large-scale, high-stakes assessments, MEAP staff have taken every step possible to minimize scoring subjectivity.

Pearson Educational Measurement has been hired as the contractor for the handscoring process. All written responses are handscored by a trained scorer that has received extensive training. The scorer must pass a qualifying test before being permitted to score student responses.

During the scoring process, periodic quality control checks are in place to ensure that scorers are evaluating responses consistently.

Scorers are trained to evaluate writing, not writers. Scorers are trained to ignore extraneous factors such as neatness and to focus on the strengths of responses rather than the weaknesses.

Specific score point descriptions and sample student papers will be available at the MEAP web page (www.michigan.gov/meap).

The remainder of this section contains scoring information for the ELA and social studies extended-response items. In math and science, a unique scoring rubric is created for each constructed-response item. Therefore, the math and science scoring rubrics are not included in this guide.

Scoring the English Language Arts (ELA) Assessment Grades 3–8 Fall 2005

Each English Language Arts (ELA) assessment contains a mixture of item types. Every grade-level assessment includes multiple-choice items and three items that require students to write a response:

- Prompt for *Writing from Knowledge and Experience*
- *Response to a Student Writing Sample*
- *Response to Paired Reading Selections*

Because each prompt requires a different type of response, there is a separate scoring rubric for each of the three prompts (pages 6–9).

All responses are scored as rough drafts and not as polished pieces of writing. Each response is scored by one scorer, with 20% of the student responses scored by a second scorer for quality control purposes.

Writing

- The *Writing from Knowledge and Experience* prompt is scored holistically using a six-point writing rubric.
- The *Response to the Student Writing Sample* is scored based upon a four-point writing rubric.
- The scores earned on the above two extended response items are added together, contributing up to 10 of the 15 possible points of a student's overall writing score.
- The remaining third of the writing test is comprised of five multiple-choice writing items, each worth one point.
- For writing, the four levels of achievement (e.g., Exceeded Michigan Standards, Met Michigan Standards, etc.) are set on the total of 15 possible points.

Reading

- The *Response to the Paired Reading Selections* is scored based upon a six-point rubric.
- It is scored only for reading content, not for the quality of the writing.

- A student's score on the *Response to the Reading Selections* is added to a student's score on the multiple-choice reading items for a total reading score.
- The four levels of achievement for reading are set on the reading scale score.

Integrated ELA Score

- ELA scale scores are calculated using a weighted average (two-thirds reading, one-third writing) of each individual student's reading and writing scale scores.
- ELA performance level cut scores are also determined by using a weighted average of the scale score cuts for reading and writing
- A student must have a valid reading score **and** a valid writing score to obtain an integrated ELA score. Students receive a valid score for reading **or** writing if at least five multiple-choice or constructed-response raw score points are attempted.
- The listening portion of the ELA assessment is not counted in the integrated ELA score because it is an optional assessment.

Listening

- There are 10 multiple-choice items for a total of 10 points.
- Only two levels are set for listening: "Met or Exceeded Michigan Standards" or "Did Not Meet Michigan Standards."

Grades 3–8

Reading: *Response to the Paired Reading Selections*
Scoring Rubric and Condition Codes

- 6** The student clearly and effectively chooses key or important ideas from each reading selection to support a position on the question and to make a clear connection between the reading selections. The position and connection are thoroughly developed with appropriate examples and details. There are no misconceptions about the reading selections. There are strong relationships among ideas. Mastery of language use and writing conventions contributes to the effect of the response.
- 5** The student makes meaningful use of key ideas from each reading selection to support a position on the question and to make a clear connection between the reading selections. The position and connection are well developed with appropriate examples and details. Minor misconceptions may be present. Relationships among ideas are clear. The language is controlled, and occasional lapses in writing conventions are hardly noticeable.
- 4** The student makes adequate use of ideas from each reading selection to support a position on the question and to make a connection between the reading selections. The position and connection are supported by examples and details. Minor misconceptions may be present. Language use is correct. Lapses in writing conventions are not distracting.
- 3** The student takes a clear position on the question. The response makes adequate use of ideas from one reading selection or partially successful use of ideas from both reading selections to support the position. The position is developed with limited use of examples and details. Misconceptions may indicate only a partial understanding of the reading. Language use is correct but limited. Incomplete mastery over writing conventions may interfere with meaning some of the time.
- 2** The student takes a clear position on the question. There is partially successful use of ideas from one reading selection or minimal use of ideas from both reading selections to support the position. The position is underdeveloped. Major misconceptions may indicate minimal understanding of the reading. Limited mastery over writing conventions may make the writing difficult to understand.
- 1** The student takes a position on the question but only makes minimal use of ideas from one reading selection or the student attempts to support an unclear position with minimal use of ideas from both reading selections. Ideas are not developed and may be unclear. Major misconceptions may indicate a lack of understanding of the reading. Lack of mastery over writing conventions may make the writing difficult to understand.
- 0** The response was not able to be scored.
- Condition codes:**
- A** Off-topic or insufficient
 - B** Written in a language other than English or illegible
 - C** Blank or refused to respond
 - D** Retells or references the reading selections with no connection to the question asked
 - E** Responds to the question with no reference to either of the reading selections

Michigan Educational Assessment Program
Fall 2005 English Language Arts Assessment
Grades 3–8
Comment Codes

In addition to the holistic scores, students may receive feedback in the form of a comment code on their response to the *Writing from Knowledge and Experience* prompt and their *Response to the Paired Reading Selections*. Students receiving a 0 score will not receive a comment code. Numerical codes representing the comments are as follows:

Writing from Knowledge and Experience

1. Lacks focus on one central idea.
2. Demonstrates limited control over sentence structure, vocabulary and/or conventions.
3. Needs details and examples to adequately develop the ideas and content.
4. Lacks coherent organization and/or connections between ideas.
5. Needs richer development of the central idea with some additional, relevant details and examples to get a higher score.
6. Needs tighter control of organization and/or the connections among ideas to get a higher score.
7. Needs greater precision and maturity of language use to get a higher score.
8. Earned the highest score point of 6.

Response to the Paired Reading Selections

1. Lacks a clear position.
2. Lacks clarity, which causes confusion.
3. Needs examples and details from the reading selections to adequately develop the position.
4. Supports the position with examples and details from only one reading selection.
5. Does not make a connection across the two reading selections.
6. Contains misconceptions about the content of the reading selections.
7. Needs richer support of the position with some additional examples and details from the reading selections.
8. Needs greater precision and mastery of language use.
9. Earned the highest score point of 6.

**Scoring the Social Studies Assessment
Grades 6 and 9
Fall 2005**

Social Studies assessments for Grades 6 and 9 contain two item types. Each grade-level assessment includes 46 multiple-choice items, with up to 10 items from each of the following strands: History, Geography, Civics, Economics, and Inquiry. There is also one Decision-Making item that requires students to write a persuasive essay about a public policy issue in response to a data section prompt. The student response is scored holistically using a three-point writing rubric for Grade 6 and a four-point writing rubric for Grade 9. (*The Scoring Rubric for Grade 6 is on page 11. The Scoring Rubric for Grade 9 is on page 13.*) All responses are scored as rough drafts and not as polished pieces of writing. Each response is scored by one scorer with 20% of the student responses scored by a second scorer for quality control purposes.

Core Democratic Values – Grade 6

The persuasive essay item asks students to take a stand on a public policy issue in response to a prompt, and to support their position using the *Core Democratic Values*. The students are referred to the following information located in the back of their assessment booklet.

**Some Core Democratic Values of
American Constitutional Democracy**

Core democratic values are ideas in which Americans believe. These values unite all Americans. They are saved for us in important documents, speeches, and writings of the nation. Below is a list of some core democratic values. **You may use any core democratic value to support your position, including those not on this list.** Be sure to explain **how** the value you choose supports the position you take.

Life
Liberty
The Pursuit of Happiness
Public or Common Good
Justice
Equality
Diversity
Truth
Popular Sovereignty
Patriotism
The Rule of Law
Individual Rights

Michigan Educational Assessment Program
Social Studies Assessment
Fall 2005
Holistic Scoring of Civic Writing – Grade 6

- 3** The response must give a clearly stated position on the issue and support for that position. Students use words such as support/oppose, for/against, agree/disagree, or should/should not. The student provides at least one supporting point that is based on the *Core Democratic Values*, **and** at least one piece of supporting information from the *Data Section* that is accurate, valid, and relevant. The student's supporting points must be explained in enough detail to show a clear connection to the position taken.
- 2** The response must give a clearly stated position on the issue and support for that position. Students use words such as support/oppose, for/against, agree/disagree, or should/should not. The student provides at least one supporting point that is based on the *Core Democratic Values*, **or** at least one piece of supporting information from the *Data Section* that is accurate, valid, and relevant. The student's supporting points must be explained in enough detail to show a clear connection to the position taken.
- 1** The response must give a clearly stated position on the issue and support for that position. The student's supporting points must be explained in enough detail to show a clear connection to the position taken.
- 0** The response was not able to be scored.

Condition codes:

- A** Off-topic
- B** Written in a language other than English or illegible
- C** Blank or refused to respond

The following characteristics in a student response will **not** contribute toward a positive score:

- The student does not take a stand, or says that someone else (parents, school, or government) should decide the issue.
- The supporting point based on the *Core Democratic Values* contradicts the stated position.
- The supporting information from the *Data Section* contradicts the stated position.
- *Data* interpretations are not accurate, valid, or relevant.

Comment Codes – Grade 6

In addition to the holistic scores, students may receive feedback in the form of a comment code. Students receiving a 0 score will not receive a comment code. Numerical codes representing the comments are as follows:

1. Includes clear and supported position statement
2. Contains supporting Core Democratic Value
3. Uses supporting information from Data Section

Michigan Educational Assessment Program
Scoring the Social Studies Assessments

- 4** The response must give a clearly stated position on the issue and support for that position. Students use words such as support/oppose, for/against, agree/disagree, or should/should not. The student's supporting points must be explained in enough detail to show a clear connection to the position taken.

The student must provide at least one supporting point from *each* of the following:

- position support based on the *Core Democratic Values*
- supporting information from the *Data Section* that is accurate, valid, and relevant to the student's position
- supporting social studies information that comes from the student's *prior knowledge* of civics, economics, geography, or history, that is accurate, important, and relevant to the student's position. This information must be something other than the information supplied by the *Data Section* or a *Core Democratic Value*.

- 3** The response must give a clearly stated position on the issue and support for that position. Students use words such as support/oppose, for/against, agree/disagree, or should/should not. The student's supporting points must be explained in enough detail to show a clear connection to the position taken.

The student provides at least one supporting point from *two* of the following:

- position support based on the *Core Democratic Values*
- supporting information from the *Data Section* that is accurate, valid, and relevant to the student's position
- supporting social studies information that comes from the student's *prior knowledge* of civics, economics, geography, or history, that is accurate, important, and relevant to the student's

position. This information must be something other than the information supplied by the *Data Section* or a *Core Democratic Value*.

- 2** The response must give a clearly stated position on the issue and support for that position. Students use words such as support/oppose, for/against, agree/disagree, or should/should not. The student's supporting points must be explained in enough detail to show a clear connection to the position taken.

The student provides at least one supporting point from *one* of the following:

- position support based on the *Core Democratic Values*
- supporting information from the *Data Section* that is accurate, valid, and relevant to the student's position
- supporting social studies information that comes from the student's *prior knowledge* of civics, economics, geography, or history, that is accurate, important, and relevant to the student's position. This information must be something other than the information supplied by the *Data Section* or a *Core Democratic Value*.

- 1** The response must give a clearly stated position on the issue and support for that position. The student's supporting points must be explained in enough detail to show a clear connection to the position taken.

- 0** The response was not able to be scored.

Condition codes:

- A** Off-topic
- B** Written in a language other than English or illegible
- C** Blank or refused to respond

Michigan Educational Assessment Program
Social Studies Assessment
Fall 2005

Holistic Scoring of Civic Writing – Grade 9 *continued*

The following characteristics in a student response will **not** contribute toward a positive score:

- The student does not take a stand, or says that someone else (parents, school, or government) should decide the issue.
- The supporting point based on the *Core Democratic Values* contradicts the stated position.
- The supporting information from the *Data Section* contradicts the stated position.
- *Data* interpretations are not accurate, valid, or relevant.
- Student responded based on feelings or opinions instead of *prior knowledge* of civics, economics, geography, or history.
- Support based on *prior knowledge* contradicts the stated position.

Comment Codes – Grade 9

In addition to the holistic scores, students may receive feedback in the form of a comment code. Students receiving a 0 score will not receive a comment code. Numerical codes representing the comments are as follows:

1. Includes a clear and supported position statement
2. Contains supporting *Core Democratic Value*
3. Uses supporting information from Data Section
4. Provides supporting knowledge from Social Studies

Michigan Educational Assessment Program
Score Categories and Scale Score Ranges

Fall 2005

Grades 3–9

The standard setting process to determine scale score cuts and ranges for each proficiency level, for all grade levels and content areas, is in process as this document goes to print. Once Performance Level categories and Scale Score Ranges have been set and approved by the Michigan State Board of Education, they will be posted on the MEAP website at www.michigan.gov/meap. Districts will be notified via e-mail when this information becomes available. Please print the page from the website and insert here.

(THIS PAGE IS INTENTIONALLY LEFT BLANK)

Section 2

Report Descriptions

Michigan Educational Assessment Program (MEAP)

Sample Reports

Fall 2005

The sample reports included in this *Guide to Reports* are intended to provide examples of the report formats, data organization, and types of information contained in each report.

These sample reports were printed prior to availability of real data. Data contained in these sample reports do not refer to any specific assessment item, or any specific student, school, or district.

Summary Report Description

The Summary Report provides a comparative set of mean scale score information for each grade level, summarized by school, district, ISD, and state. The Summary Report is generated for three student populations:

- All students
- Students with disabilities (SWD)
- All except students with disabilities (AESWD)

Section A identifies the title of the report, the level of aggregation (school, district, ISD, state), the student population included in the report, the grade level, the assessment cycle, and the content area. School, district, and ISD names and codes are included as applicable.

Section B provides summary data for each content area. Summary data reported includes the number of students assessed, the mean scale score, scale score margin of error,* the percentage of students attaining each proficiency level, and the percentage of students that met or exceeded Michigan standards within each content area. Five years of summary data will be reported. In addition to content area summaries, the ISD Summary Report will include Section B summary data for the current assessment cycle for each district and charter school within its boundaries.

Note: The Fall 2005 assessment is the baseline year for the revised MEAP, so it will be the only data reported on the Fall 2005 Summary Report. The Fall 2006 Summary Reports will include data from Fall 2005 and Fall 2006. Summary data will be added each year so the Fall 2009 reports will include summary data for each assessment from Fall 2005 through Fall 2009.

Section C provides summary data for each domain or benchmark within each strand. The summary data reported includes the code and descriptor for each GLCE (math) or benchmark (science and social studies), the assessment form assigned to the school (located just above the page number at the bottom center of the report page), the number of students assessed using that form, the mean points earned, the total number of points possible, and the percentage of students earning each point value. This summary data will include aggregate and mean data for all students using the assessment form assigned to the school.

Note: Section C will be included on the School Summary only. This summary data will not be meaningful at the district or ISD level because each school was assigned a different form and the maximum number of points possible for each domain or benchmark will vary depending on the form administered. Districts will receive a copy of the School Summary Report for each school within their district.

* Scale score margin of error is equivalent to the Mean score ± 2 standard errors of the mean. This is the likely range within which the true average scale score would fall for the students listed on this report.

Fall 2005 Run Date: 11/11/05 batchxxx-dstschcode-0000000

Demographic Report Description

The Demographic Report provides a summary breakdown of scores by demographic subgroup for each content area assessed. Summary data reported includes the number of students assessed in each subgroup, the mean scale score, the percentage of students attaining each performance level, and the percentage of students that met or exceeded Michigan standards within each content area. The Demographic Report is generated for three student populations:

- All students
- Students with disabilities (SWD)
- All except students with disabilities (AESWD)

The demographic subgroup scores are aggregated by school, district, ISD, and state. The demographic subgroups reported are:

- Gender
- Ethnicity
- Economically Disadvantaged (ED)
- English Language Learners (ELL)
- Formerly Limited English Proficient (FLEP)
- Migrant

Please note the following:

- 1) *A separate report is generated for the Students with Disabilities subgroup.*
- 2) *Homeless student data is also included on the Demographic Report.*
- 3) *No summary scores are provided for subgroups containing less than ten students.*

- 4) *Students that have been enrolled in your district for less than one full academic year (LTFAY) at the time of the MEAP assessment administration will no longer be reported as a subgroup on this report. Calculation of this data for AYP purposes will be determined from the enrollment data submitted via SRSD. LTFAY is defined by NCLB as less than two prior count days. Students enrolled after February 9, 2005, are considered LTFAY for the Fall 2005 assessment. These students are included in all applicable demographic subgroups.*

Section A identifies the title of the report, the level of aggregation (school, district, ISD, state), the student population included in the report, the grade level, and the assessment cycle. School, district, and ISD names and codes are included as applicable.

Section B lists the demographic subgroups, as well as the total student population being reported. Ethnicity subgroups are defined by federal requirements. (Refer to the Ethnicity definitions in the MEAP Coordinator manual www.michigan.gov/meap for definitions.) The remaining categories are reported by a *yes* or *no* response.

Section C reports the number of students included in the subgroup, the mean scale score, the percentage of students attaining each performance level, and the percentage of students that met or exceeded Michigan standards within each content area.

This is a multiple-page report with ELA scores reported on one page and Math, Science, and Social Studies scores reported on another page for each of the three student population groups identified in the first paragraph on this page.

Fall 2005 Run Date: 11/11/05 batchxxx-dstschcode-0000000

Feeder School Report

The Feeder School Report is a Summary Report provided to feeder schools at transition grade levels. For example, District A has three elementary schools (K–5) feeding into one middle school (6–8). Each elementary school will receive a Feeder School Report summarizing the data for current sixth-grade students that were enrolled in their elementary school at the end of Grade 5.

Section A identifies the title of the report, the assessment grade level reported, the assessment cycle, and the content area. The Feeder Grade (grade level the students were most recently enrolled in at the Feeder School), Feeder School name and code, Tested School name and code, and the district name and code are also included.

Section B provides summary data for each content area. Summary data reported includes the number of students assessed coming from the feeder school in the district, the mean scale score, the scale score margin of error,* the percentage of students attaining each proficiency level, and the percentage of students that met or exceeded Michigan standards within each content area.

Section C provides summary data for each domain or benchmark within each strand. The summary data reported includes the code and descriptor for each GLCE (math) or benchmark (science and social studies), number of students assessed, the mean score, the total number of points possible, and the percentage of students earning each point value. This summary data will include aggregate and mean data for all students using the assessment form assigned to the school. The form number is located just above the page number at the bottom center of the report.

* Scale score margin of error is equivalent to the Mean score ± 2 standard errors of the mean. This is the likely range within which the true average scale score would fall for the students listed on this report.

Form 1
Page 1 of 1

Fall 2005 Run Date: 11/11/05 batchxxx-dstschcode-0000000

Item Analysis Report Description

The Item Analysis Report provides summary information for each selected response (multiple-choice) item, and each constructed-response item on the assessment, including the primary Michigan benchmark (GLCE) measured by each item. The summary information reports the percentage of students selecting each response. The Item Analysis Report is generated for three student populations:

- All students
- Students with disabilities (SWD)
- All except students with disabilities (AESWD)

The aggregate data is reported by class or group, school, district, and state. This report may include multiple pages (*see two-page sample Item Analysis Report on pages 25 and 27*). Page numbers are printed in the center at the bottom of each report page.

Section A identifies the title of the report, the student population included in the report, the grade level, the assessment cycle, and the content area. The teacher name, class/group code, the school name and code, the district name and code, and the number of students assessed are also provided.

Sections B and C report data on each **multiple-choice item**.

- **Section B** lists the Released Item Number, the benchmark or GLCE being assessed, and the Item Type (core, extended core, linking, future core) for each **multiple-choice item**.

The Fall 2005 Released Item documents for each grade level and content area are posted on the MEAP website at www.michigan.gov/meap.

The Released Item Number for *linking* items references the *previous* grade level Released Item document.

- **Section C** indicates the **percentage** of students selecting each response to the multiple-choice questions in section B. A plus sign (+) denotes the correct response.

continued on page 26

Item Analysis Report Description

continued from page 24

Sections D, E, and F report data on each **constructed-response** or **extended-response** item.

- **Section D** lists the Released Item Number, the GLCE or benchmark being assessed, and the **Mean Score** for the reported population, for each constructed-response or extended-response item.
- **Section E** reports the **percentage** of students achieving each score level on a constructed-response or extended-response item in Section D.
- **Section F** reports the **number** of student responses that received each Condition Code or Comment Code. The condition codes and comment codes are not reported at the individual student level for the Fall 2005 assessments.

Condition Codes (student response receiving a 0 score):

- A) Off-topic/Insufficient
- B) Written in a Language other than English/Illegible
- C) Blank/Refused to respond
- D) No connection to the question (ELA only)
- E) No reference to either reading selection (ELA only)

Comment Codes provide additional feedback to students and educators on the extended-response items in the English Language Arts and Social Studies content areas. The numeric Comment Codes are defined on the reverse side of the Item Analysis Report. They also appear on pages 9–14 of this *Guide to Reports*.

Please Note:

Some assessment items may be particularly difficult or easy. Educators may consider how well their student groups did on an assessment item, benchmark, or strand in relation to the state results reported. State results provide a good comparison for how easy or difficult an assessment item is for all students.

Several items are used to assess some benchmarks, while other benchmarks or strands may be assessed by only a single item. A larger number of assessment items provides more reliable results. Both of these factors may make the interpretation of item analysis reports more difficult.

Teachers may use the Item Analysis Report to pose a hypothesis about how a group of students has performed on a benchmark or strand within a content area. This hypothesis should be further evaluated using classroom and other assessment information before making decisions to adjust curriculum or instruction.

Class Roster Report Description

The Class Roster provides summary score information by class, for each strand and benchmark (GLCE) assessed within each content area, as well as detail information for each student assessed. This report may include multiple pages to report all strands, benchmarks, and GLCEs (*see two-page sample Class Roster on pages 29 and 31*). Page numbers are printed in the center at the bottom of each report page.

Section A identifies the title of the report, the grade level reported, the assessment form used, the assessment cycle, and the content area. The teacher name, class/group code, the school name and code, and the district name and code are also provided.

Note: A separate Class Roster Report will be generated for each assessment form administered within a class/group.

Section B lists each student's name followed by their Unique Identification Code (UIC), and Date of Birth (DOB). The Scale Score and Performance Level attained by the student are also reported.

Note: The Scale Score and Performance Level will not appear on the Preliminary Class Roster (see page 2).

Section C provides the following information for each benchmark (GLCE), detailed by student:

- Benchmark or GLCE assessed
- Core type (core, extended core, future core, or linking item)
Please note that future core items are shaded. They are not included in student scores or strand totals.
- Number of points possible
- Number of points earned by the student
Note: Some items did not translate well to Braille, and were omitted from the Braille version of the assessment.
- Scores are subtotaled by strand (*see page 29*), and core type (*see page 31*)

Section D reports the class/group mean score for each benchmark (GLCE), strand, and core type.

Individual Student Report (ISR) Description

The intent of the Individual Student Report (ISR) is to provide a detailed description of each student's performance in the content areas assessed on the MEAP. This report is designed to help educators identify the academic strengths of their students and the areas that may need improvement. Schools may include these reports in student record files.

Section A identifies the content area, the grade level, and the assessment cycle. It also lists the name of the teacher (if provided by the district on the Class/Group ID sheet when the answer folders were returned for scoring), class/group code, and the names of the school and district the student was enrolled in at the time the assessment was administered.

Section B contains student identification and demographic information, as well as a summary of the student's performance in that content area. The specific identification and demographic fields reported are:

- | | |
|-----------------------|----------------------------|
| • Student Name | • Ethnicity |
| • Date of Birth | • English Language Learner |
| • District Student ID | • Formerly LEP |
| • State Student UIC | • Special Education |
| • Gender | • Accommodations Type |

The **Performance Summary** includes the assessment form, the number of points the student earned out of the total number of points possible, the student's scale score, and the performance level attained.

***Note:** The scale score and performance level attained will not be included on the **Preliminary** Individual Student Report. Please see page 2 of this guide.*

Section C provides detailed information on the individual student's performance for each released assessment item. All items except field test items are included. The number of points earned out of the total number of points possible is reported for each strand assessed.

Each strand is further subdivided into the primary Michigan benchmarks assessed. The following information is provided for each **benchmark**:

- the GLCE code and descriptor
- the item number in the *Released Items* document
- the student's response to that item number – the Response Code legend is provided in the lower left corner of the ISR
- the number of points earned out of the total number of points possible for that benchmark

Please note the following when using the data on the ISR:

- **Linking** items are assessment items from the previous grade assessment, e.g., Grade 3 assessment items also assessed on the Grade 4 assessment. The Item Number for these linking items refers to the Item Number in the **Previous Grade Level Released Items** document. For example, Linking Item Numbers reported on the Grade 4 ISR reference the Released Item Number in the Grade 3 *Released Items* document.
- **Future Core** items do not contribute to the student's score. The item number and student response are reported, however no individual student score is calculated or reported for these items.
- Fall 2005 **Released Item documents** for each grade level and content area are posted on the MEAP website at www.michigan.gov/meap.

***Note:** Copyright permissions for the Fall 2005 ELA Reading Selections did not include Internet permissions. Ten printed copies of the Released Item Reading Selections for Grades 3–8 will be mailed to each school and district with their Final Reports.*

Student Record Label Description

A Student Record Label is provided for each student assessed during the Fall 2005 cycle. The labels are mailed to the school for placement in the student record file (CA-60).

Section A contains the district name and code and the school name and code.

Section B contains the student's name, date of birth, gender, ethnicity code, and grade level when the assessment was administered. Also included are the student's state Unique Identifier Code Number (UIC#), the District Student ID Number (STU#) if provided by the school during the student pre-ID process, and the MEAP administration cycle.

Section C contains the **Subject** areas assessed, the **Form** used by the student, the scale score (**SS**) received, and the **Performance Level** the student attained in each subject area.

Level 1 – Exceeded Michigan Standards

Level 2 – Met Michigan Standards

Level 3 – demonstrated Basic knowledge and skills of Michigan standards

Level 4 – considered to be at an Apprentice level, demonstrating little success in meeting Michigan standards.

Note: Each label is 4 inches by 2 inches and can be printed on AVERY stock 5163.

Parent Report Description

The intent of the Parent Report is to provide a summary description of their student's performance in each content area assessed on the MEAP. This report is designed to help parents and guardians identify the academic strengths of their student and areas that may need improvement. Information from this report may be helpful when discussing academic progress of the student with the classroom teacher(s).

Section A provides the assessment cycle, the grade the student was in when the assessment was administered, and the name of the student. It also lists the name of the school and the school district the student was enrolled in at the time the assessment was administered.

Section B provides a brief introductory letter addressed to the parent(s) or guardian(s) of the student describing the purpose of the MEAP and summarizing information contained in the Parent Report.

Section C (the inside pages of the Parent Report, *see pages 38–39*) describes how the student performed in each content area, on each content area strand, and the total points possible for the strand. The brief explanation for each subject area provides the performance level score the student attained and the accompanying scale score, as well as information on how the student's performance relates to Michigan standards. For example, if a student received a Level 2 on the eighth-grade mathematics assessment, that student has “Met” Michigan standards.

For students taking the English language arts (ELA) assessment, the scores and performance levels have been divided into reading, writing, listening (*if applicable*), and an integrated English Language Arts (ELA) score which is a combined performance level for reading and writing. The combined ELA score is weighted two-thirds reading, one-third writing.

Section D provides space for the student's mailing address or address label, (*see page 40*).

Please Note:

The MEAP results for individual students are most reliable and valid at the overall content area scale-score level. These scale scores also are reliably associated with a performance level. Parents can have confidence that the reported content area scale scores and performance levels provide accurate information for each subject.

Student scores for strands are also provided in these Parent Reports. These are less reliable measures than subject scores and performance levels because there are fewer items within strands than on the total subject test. These results provide an approximate measure of the level of performance of the student.

Parents should be careful in drawing conclusions about a student's strengths or weaknesses at the strand level. It is more appropriate to use this strand information together with classroom assessment data, teacher-provided information, and other performance information to guide learning activities.

Parent Report

Grade 5
Fall 2005

District Name: WANTTObETTER PUBLIC SCHOOL
District Code: 00040

School Name: SUPERIOR ELEMENTARY
School Code: 34567

A

Report For:
Firstnamex I. Lastnamexxxxxxxxxx

Dear Parent or Guardian:

During October, 2005, schools participated in the Michigan Educational Assessment Program (MEAP). The federal No Child Left Behind law requires all students in grades 3 to 8, including <Student First Name>, to take the English language arts and mathematics assessments. Students also had the opportunity to take science assessments in grades 5 and 8 and social studies in grades 6 and 9.

The MEAP assessments are important tests that measure what students know and can do in the content areas and grades assessed. MEAP specifically addresses content in the Michigan curriculum frameworks. Most schools have adopted similar curriculum standards. The results presented in this report provide a valid and reliable assessment of how well <Student First Name> is doing overall in the specific content areas assessed.

We encourage you to discuss the MEAP results for <Student First Name> with their teacher and other school professionals who have the benefit of knowing your student personally. Teachers are able to use the MEAP results, together with other assessment and classroom performance information, to provide a more full analysis and a plan for your student's learning.

Parents and teachers have a greater chance of helping children succeed when working together to encourage student learning.

Sincerely,

Michael Flanagan
Superintendent of Public Instruction
State of Michigan

Results for Firstnamex

Subject	Scale Score	Performance Level
Mathematics	665	Exceeded Standards
Science	665	Exceeded Standards
Reading	665	Exceeded Standards
Writing	665	Exceeded Standards
Total English Language Arts	665	Exceeded Standards

Performance Level Descriptors

Level 1: Exceeded Standards

The student's performance exceeds proficiency standards and indicates substantial understanding and application of key curriculum concepts defined for Michigan students.

Level 2: Met Standards

The student's performance is proficient and indicates sufficient understanding and application of key curriculum concepts defined for Michigan students.

Level 3: Basic

The student's performance is not yet proficient, indicating a partial understanding and application of key curriculum concepts defined for Michigan students.

Level 4: Apprentice

The student's performance is not yet proficient and indicates minimal understanding and application of key curriculum concepts defined for Michigan students.

Care must be taken in understanding the results of these assessments. Your student's scores reflect performance on a given day under standardized administration procedures. The standardized scale scores are the most stable of your student's scores. Strand scores within subject may vary more because fewer items are used to measure strands.

We encourage parents to discuss these results with the teacher who can provide more information by using results from other assessments and classroom performance. The teacher is in the best position to provide guidance in designing appropriate instruction for your student.

English Language Arts

Reading: The reading scale score is reported below on a scale including the range and performance level.

Reading Domains	Points Earned	Points Possible	% Correct
Domain 1	99	99	100%
Domain 2			
Domain 3			
Domain 4			

On the reading assessment the students were asked to read for understanding within and across texts, answer multiple-choice questions, and demonstrate their understanding of text through a written response. All questions on the reading assessment are based upon the Michigan Department of Education English Language Arts Grade Level Content Expectations in reading.

The reading domains at left shows the points possible, as well as the percent correct and points earned by your child.

A STUDENT WHO EXCEEDED STANDARDS: Uses knowledge about text features and structures to accurately and insightfully construct meaning and to synthesize and evaluate themes within and across texts. Writes and supports a thorough and effective response, taking a clear position on a question without misconceptions about the texts.

Structure - examples include: narrative, expository
Features - examples include adjunct aids, such as maps, charts, illustrations

Writing: The writing scale score is reported below on a scale including the range and performance level.

Writing Domains	Points Earned	Points Possible	% Correct
Domain 1	99	99	100%
Domain 2			
Domain 3			
Domain 4			

On the writing assessment, students were asked to write about a topic using their own knowledge and experience, answer five multiple-choice questions and respond in writing to a grade level (peer) writing sample. All questions on the writing assessment are based upon the Michigan Department of Education English Language Arts Grade Level Content Expectations in writing.

The writing domains at left shows the points possible, as well as the percent correct and points earned by your child.

A STUDENT WHO EXCEEDED STANDARDS: Writes in an exceptionally clear and focused manner about a central idea or task; uses well-organized and fully developed details and language that enhance meaning and effectiveness; and assesses the quality of his/her own writing and the writing of others by applying expert standards.

Total English Language Arts: The Total English Language Arts scale score is reported below on a scale including the range and performance level.

What is Standard Error of Measurement (—◆—) ?

The diamond indicates your child's scale score for the tested subject. This is your child's overall subject scale score and is used to determine the level your child achieved. The horizontal bar indicates the Standard Error of Measurement. This means that had your child taken this test on a different day or had been asked different questions covering the same subject, he/she may have received a different score which probably would have fallen somewhere along this bar.

Mathematics: The mathematics assessment results are reported in a scale score shown in the graph below.

At the beginning of fifth grade students are expected to count, read, write, and compare whole numbers up to 1,000,000. They can fluently add and subtract multi-digit numbers, multiply two-digit by three-digit numbers, divide by numbers 10 or less, and use these computations to solve applied problems. The students have developed their understanding of factors and multiples, can estimate sums, differences, and products, and can find the value of the unknown in simple equations. The students have a good understanding of fractional quantities, including decimal fractions, as both part of a whole and part of a set, can compare and order them, locate them on the number line, and find equivalent forms. The students are able to use common measurement tools with precision, can convert quantities within a measurement system (e.g., 2 ft. = 24 in.) and can find perimeters and areas of rectangles. The students understand and use basic properties of 2-D and 3-D shapes to solve problems and can solve problems comparing by data presented in bar graphs and tables, and find medians.

Mathematics Strands	Points	Points	%
	Earned	Possible	Correct
Number & Operations	99	99	100%
Algebra			
Measurement			
Geometry			
Data & Probability			

Science: Your student's science scale score is reported on the graph below.

During the elementary school grades, students observed and explored the science of living things, the physical world around them, and the elements and processes that make up and affect Earth.

Students began to use inquiry skills to construct new scientific knowledge to make sense of their observable world. They used their senses to test predictions that answer questions. Students reflected on scientific knowledge to decide whether evidence supports decisions that may affect their lives.

The Science Strands at right show the points possible, as well as the percent correct and points earned by your child.

A STUDENT WHO EXCEEDED STANDARDS:

Designed investigations to explain real-world events and demonstrated deep connected knowledge of the life, Earth, and physical science concepts presented in the Michigan Science Curriculum Framework for elementary school. (see www.michigan.gov/documents/Updated_Science_Benchmarks_27030_7.pdf)

Science Strands	Points	Points	%
	Earned	Possible	Correct
Constructing New Scientific Knowledge	99	99	100%
Reflecting on Scientific Knowledge			
Using Life Science Knowledge			
Using Physical Science Knowledge			
Using Earth Science Knowledge			

SAMPLE

SPACE FOR THE ADDRESS LABEL

The MEAP assessments are standardized, criterion-referenced assessments indicating what students know and can do in relation to the content defined in the Michigan Curriculum Frameworks. More information about the MEAP assessments can be found at www.michigan.gov/meap. Additional information about the State Curriculum Frameworks can be found on the Michigan Department of Education web site, www.michigan.gov/mde.

MEAP assessments are generally made up of multiple choice and written response items developed, edited and reviewed several times by Michigan teachers and educators using a rigorous process that meets national technical standards. The raw scores in this report indicate the number of points assigned to correct responses. Scale scores are reported for each subject placing the raw scores on a standard scale so that comparisons can be made between test administrations. Performance levels were determined using test information and the expert judgment of Michigan educators and other knowledgeable stakeholders.

If you have questions about this assessment, or this report, please talk to your school or district coordinator. Your child's teachers, or principal will be able to assist you in interpreting this report.
